BARIATRIC

INSTRUMENTS

Nopa Instruments offer a full line of high-quality longer laparoscopic and open surgical instruments for bariatric patients and surgery, including a variety of patterns of needle holders, scissors, forceps, clamps and suction tubes in varied lengths for deep access. Hand-held and self-retaining retractor systems with deeper, wider blades for optimal exposure are also offered.

These longer-length instruments are available in many patterns with lengths of up to 36cm, for improved reach in bariatric patients. The instruments are made in Germany using the finest German stainless steel.
